

Application No.: 10/650,353  
Docket #: SVL920030056US1  
Replacement Abstract  
Amendment After Notice of Allowance Under 37 CFR 1.312 dated December 15, 2008

**DATABASE LOG CAPTURE THAT PUBLISHES TRANSACTIONS TO MULTIPLE  
TARGETS TO HANDLE UNAVAILABLE TARGETS BY SEPARATING THE  
PUBLISHING OF SUBSCRIPTIONS AND SUBSEQUENTLY RECOMBINING THE  
PUBLISHING**

**ABSTRACT OF THE DISCLOSURE**

A first log reader publishes first messages to a plurality of queues. The first messages comprise changes for transactions extracted from a log by the first log reader. In response to one of the queues becoming unavailable, launching a second log reader to read and extract from the log, and to publish second messages comprising changes for transactions extracted from the log by the second log reader to the unavailable queue as a catch-up queue. In response to the catch-up queue becoming available and the second log reader reaches the end of the log, the publishing of the second messages for the catch-up queue is transferred from the second log reader to the first log reader.
